

## Wedi "Ready 4 Tile™" Shower Systems

### Wedi Fundo

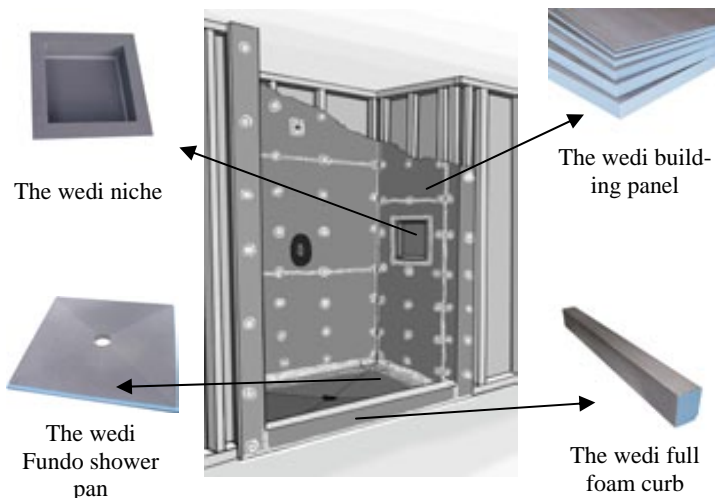

There are many ways to prepare and waterproof a shower for ceramic tile. Traditional methods are time-consuming and difficult to do properly without professional training or assistance. Newer methods commonly contain material or installation process flaws that are not apparent until after the product warranty period. Damages caused by the resulting water intrusion may lead to mold and mildew issues, increased warranty costs for builders and expensive non-warranty repair costs for DIY homeowners.

The Wedi Fundo Shower System is a single-source, time-proven, one-step waterproofing solution that offers a no-risk, easy-to-install alternative. All Wedi Fundo products are composed of 100% waterproof, closed-cell extruded polystyrene foam with a strong, rigid, tile-ready exterior surface.

Wedi Shower Systems eliminate the multiple vendor materials and time-consuming installation steps used in conventional installations. Its design also eliminates the risks related to conventional installations such as pan liner cracks, clogged weep-holes and mold growth in mud beds. The prefabricated Wedi shower pans reduce the installation time of a shower base from 2-3 days to 60-90 minutes, allowing a complete Wedi Shower System installation to be completed in less than eight hours. All Wedi shower substrate installations are tile ready the next morning.

### Wedi Fundo Shower System Components

The Wedi systems save 80% of the weight that conventional systems add to the building structure and offer thermal insulation value behind the tile. Fundo shower pans are easily trimmed or extended to fit the available shower area. Wedi has also developed curbs, ramps, wall inserts and bench seats to be used in conjunction with the Wedi Shower System allowing them to offer the only complete tile-ready shower waterproofing system on the market.

For over 25 years, Wedi GmbH has been producing waterproof materials for ceramic tile installations. Wedi has become the worldwide leader for waterproof foam core underlayment by following its philosophy of system solutions. Wedi believes in complete systems that utilize cutting edge technology and the finest materials available to provide unparalleled quality.
